

Boat Registration Numbers Order Form

Boat registration numbers are required by your state to identify your water craft. The state does not mandate that you painstakingly apply these letters one at a time, in a sloppy, unorganized and unattractive fashion. However, that's how most boat owners apply their registration numbers to their boats or personal watercraft. This does not need to be the case. Prespaced, ready to apply lettering is best.

Most states require boat registration numbers to be 3" tall and be of block style lettering. As such, we offer block style lettering as the default typestyle. We also offer a wide variety of colors designed to work with any color boat. The best way to approach color selection is to pick a color which best compliments your boat's existing colors.

Order your next boat or pwc registration numbers from SignsByWeb.com, and your boat or pwc registration numbers will look great. What's more, you can order these in a variety of colors and sizes to best fit the look and size of your boat or pwc.

Boat registration numbers from SignsByWeb.com come in a set of 2, one for each side of your boat or pwc. Measuring 3" as a standard, these lettering sets are roughly 24" wide. This dimension varies depending on the number of letters in your particular boat registration number.

In the above example, the boat registration numbers are Dark Brown. This corresponds nicely with the boat's tan color scheme. These letters above are the standard 3" tall and are cut in the standard block letterstyle as well. As stated above, most letter sets do not exceed 24" in width. In the above example, the lettering is only 22" wide. This will vary by registration number, as well as by state.
